ACKNOWLEDGMENT

The theme of this annual is Modern Science. All the drawings for this theme were graciously given by Mrs. Thomas A. Hart. The Staff is deeply indebted to her for the co-operation and interest she has shown in this student publication.

The title page represents the four basic sciences: physics, biology, chemistry, and astronomy. The six division pages have as their titles:

COMMUNICATION
TRANSPORTATION
INDUSTRY
TRAVEL
EXPLORATION
ACHIEVEMENT IN MEDICAL
SCIENCE

The **FOREWORD**

- As a scientist records all data
- in an experiment for the good
- and pleasure of present and
- future generations, so we re-
- cord in this, the second vol-
- ume of the CHIEFTAIN, ma-
- terial of the present. Herein
- we hope lies the value of this
- book in days to come.

DEDICATION

To Robert M. Strozier, who
has been a wholesome influ-
ence on the lives of the stu-
dents, who has shown patient
interest and sympathetic un-
derstanding in their welfare,
who has won their high regard
and esteem, the Staff in
grateful appreciation of his
valuable guidance dedicates
this second volume of the
CHIEFTAIN.

PRESIDENT'S MESSAGE

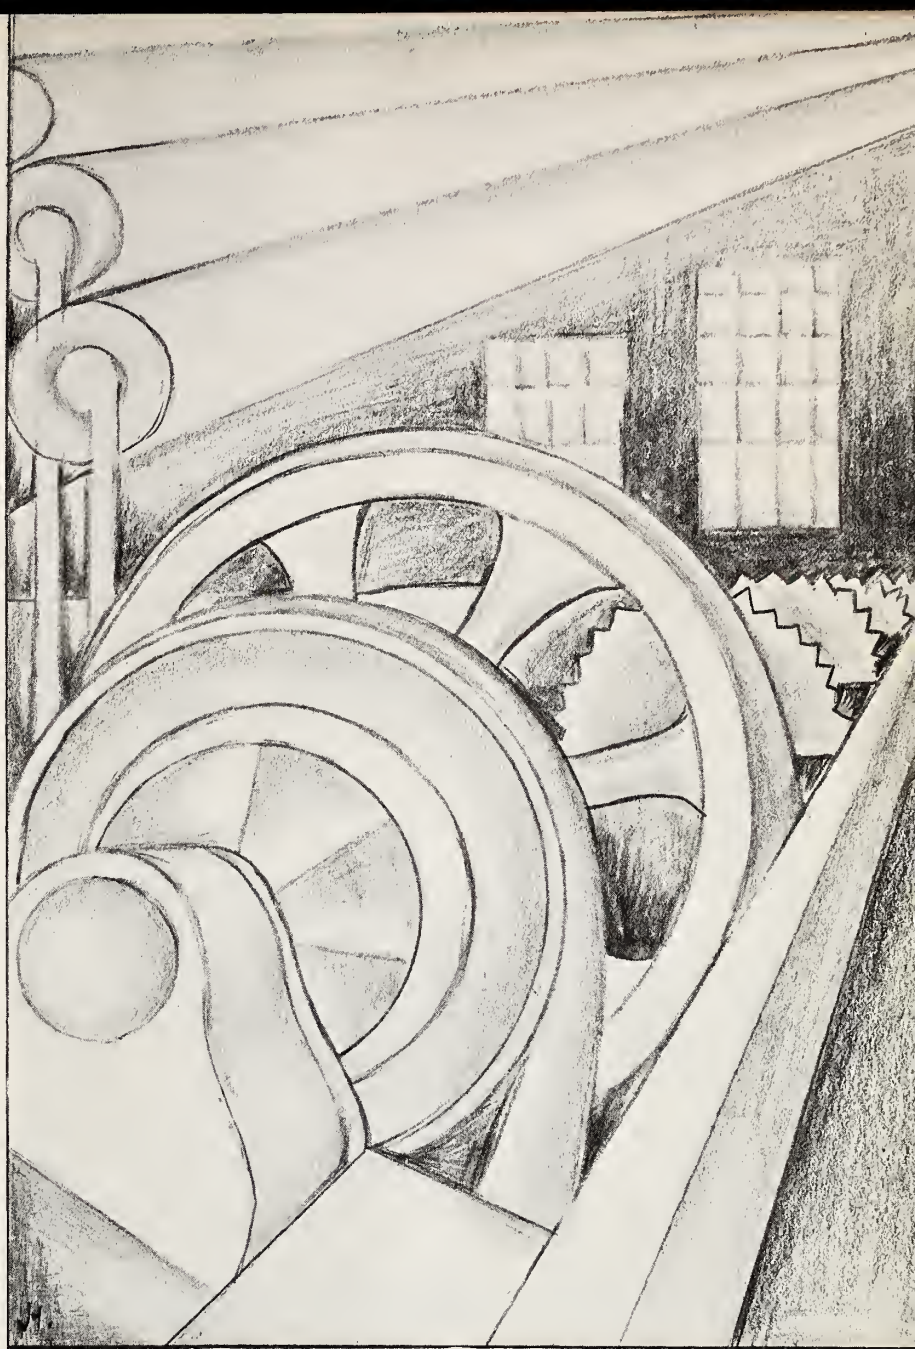

To West Georgia Students:

I am sure you join me in congratulating the staff of the CHIEFTAIN on this edition of the annual. This beautiful work is indicative of the many phases of student life at West Georgia. Around the photographs, scenes and suggestions, your memories will ever recall happy and pleasant experiences.

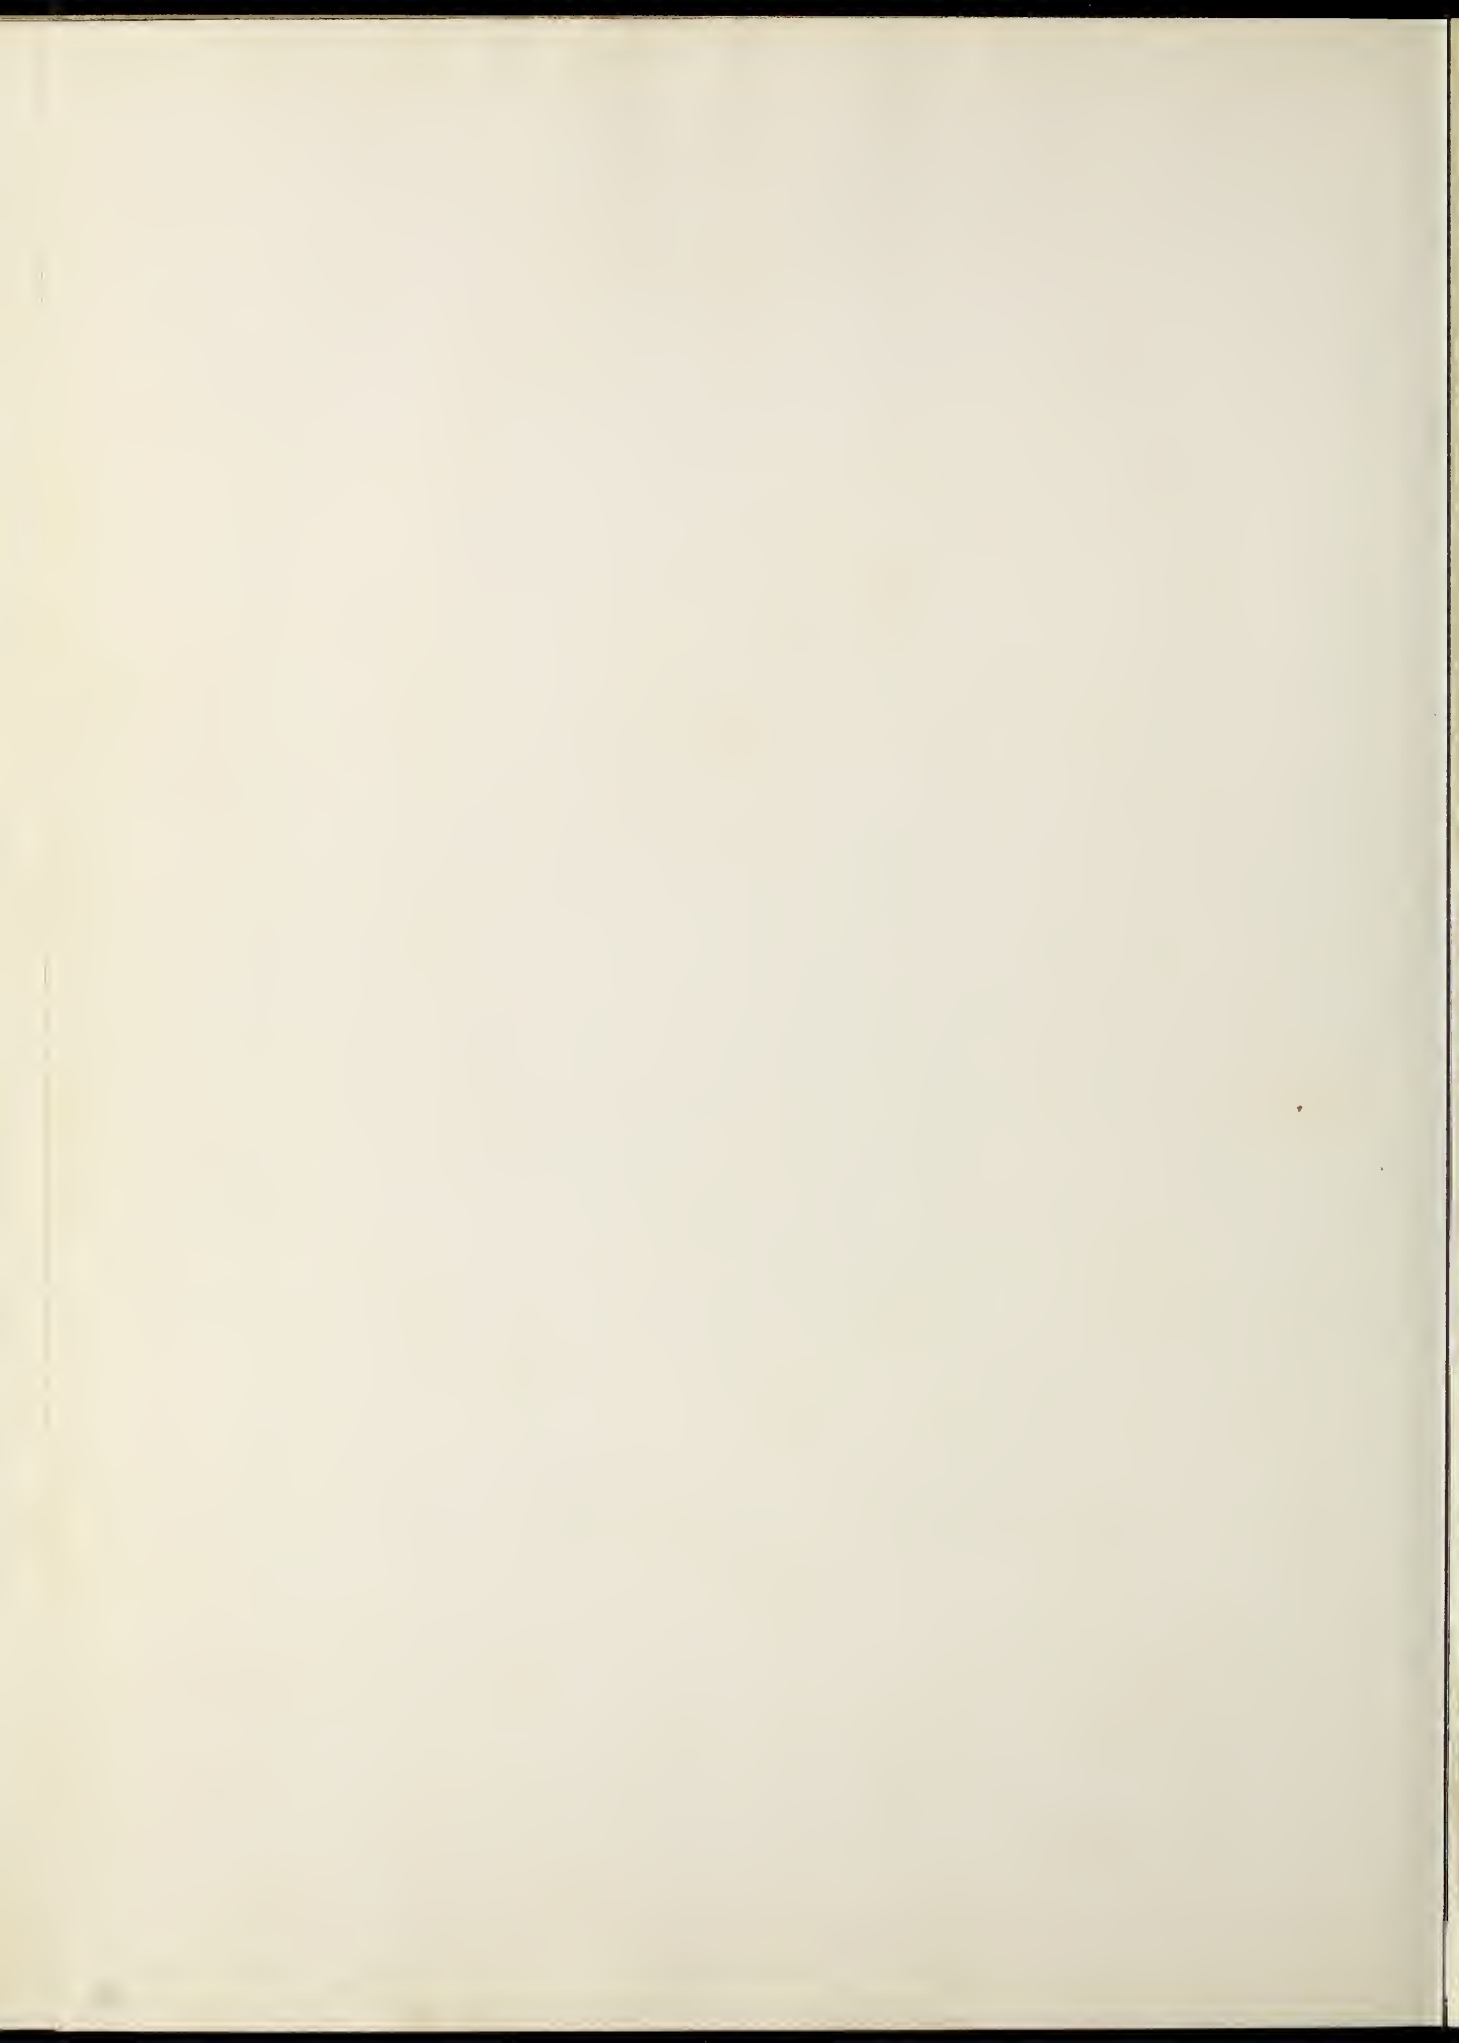

The students at Carrollton have been a select group. Their support of and their faith in this young institution together with the work of a thoroughly prepared and energetic faculty have placed West Georgia College in a coveted rank among the nation's Junior Colleges.

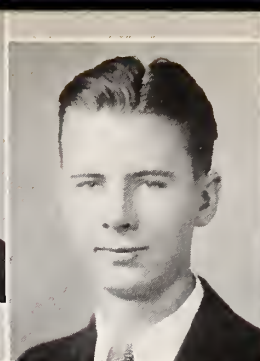

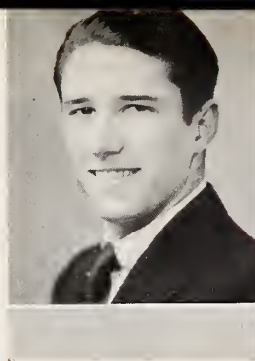

To the great number of graduates this year, it is known that you have the best wishes and the benediction of the institution. In fact, you are the institution. As you go your several ways, you will only broaden the campus and influence of the college. For after all our task is "the progressive development of individuals to take their place in and improve society."

ATHLETICS

ATHLETIC PROGRAM

We conceive physical education today to be recreation instead of an undesirable task to be done. It is our desire to:

1. To furnish students activities in which they can relax;
2. To acquaint the students with the whole field of recreation rather than just specialized participation;
3. To give the student an opportunity to find an activity that he may carry over into after life;
4. To encourage the finest form of co-operative relationships in those who are taking part in the activity;
5. To give the student a part in the running of the whole program.

The program of physical education can be likened to a pyramid. The broad base represents the participation of all students in some form of recreational activity. The apex represents those students who attain exceptional excellence in any particular form of recreation. These should have a chance to test their skill with those outside their group. Thus extra-collegiate activity will have a place.

Our physical education is organized on the plan of the athletic committee which acts in an advisory capacity to the director. The actual program is governed by the board of student managers. Each manager is entirely responsible for the activity which he manages.

This year included in the program are: touch football, soccer, basket-ball, tennis, horseshoes, wrestling, tumbling, volley ball, croquet, handball, fencing, archery, boxing, ping-pong, Indian batball, hiking, group dancing, speedball, golf, gymnastics and riflery.

The personnel includes the director, who is the co-ordinator, supervisor, and resource man; three student assistants, who do clerical work; the board of managers, their assistants, and the student body of approximately three hundred.

Physical education ideally conceived is education through participation in athletic activities. We are doing our best to do this at West Georgia College.

Director of Athletics, Board of Managers
